

## The ARCHOS 604 WiFi

**Touch screen:** The ARCHOS 604 WiFi features a large, 4.3-inch color touch screen LCD that allows you to navigate through menus easily with a stylus or even a fingertip.

**WiFi:** The integrated 802.11g wireless interfaces will appeal to those who want to access their media wherever they go, including surfing the Web, sending and receiving email from Web-based mail applications, and connecting the device to a home network to transfer files or play content directly from the network.

**Video player:** The ARCHOS 604 WiFi is the perfect companion for people on the move: its 30 GB\* hard drive capacity allows you to store up to 40 movies<sup>5</sup> encoded with a PC. Play them on the built-in 4.3" LCD color screen or

playback on TV in high resolution up to 720 x 576 (DVD quality) with the DVR station. Play a large variety of video files, including MPEG-41, WMV2 and protected WMV2 and read MPEG-4 AAC/H.2643 (.MP4 QuickTime files), MPEG-24, and VOB4 with optional software plug-ins (available on this website). The ARCHOS 604 WiFi also offers many more functionalities such as slow motion, adjustable screen size, video editing and even a video book marking function.

**Record TV or external video sources:** Transform your ARCHOS 604 WiFi into a Digital Video Recorder with the optional DVR station. Record TV or most video sources such as satellite/cable box, VCR, DVD player<sup>6</sup> or camcorder in MPEG-4 format<sup>1</sup>. Set up the DVR station by connecting it to the external video source; simply slot in your ARCHOS and record instantaneously or make scheduled recordings with the included infrared receiver that controls the external video sources.

**Turn your ARCHOS into a camcorder Record:** your personal videos. ARCHOS allows you to transform your device into a camcorder: - By connecting most digital cameras to your ARCHOS 604 WiFi, through the optional DVR travel adapter. - By connecting the optional high resolution helmet camcorder to the ARCHOS 604 WiFi. The ARCHOS 604 WiFi records video directly on its 30 GB\* hard drive in MPEG-4 format, up to VGA resolution (640 x 480).

**Music Player:** Store up to 15,000 songs<sup>5</sup> on the hard drive and play most popular music files such as MP3, WAV, WMA and protected WMA files. Easily organize songs with the enhanced ARC Library and customize your view by artist, album, type of music, title, year, and create your play lists without having to use a computer. Use the voice recorder to store notes quickly for a later use.

**Photo wallet:** Transfer your photos from a PC or most mass storage devices via the USB 2.0 high speed interface or directly from a digital camera, on the move with the optional docking adapter, or at

home with the DVR station. Store and view up to 300,000 photos5 (JPEG, PNG and BMP formats) and display slideshows with music and transition effect. Manage your files and folders directly on the device for a better mobility.

**Charge and sync:** Charge your ARCHOS 604 WiFi via the USB 2.0 interface or plug the device into the DVR station to get a quick charge (faster than USB). Purchase, download, subscribe to or rent protected video and music content from the Microsoft Plays For Sure™ websites. Using the high -speed USB 2.0 interface, the ARCHOS 604 WiFi will easily auto -synchronize this content with Windows Media® Player 10 each time you connect it to your P C, or convert your Windows Media® Player 10 library content to one of the many compatible formats (MP3, WMA, WAV, protected WMA, MPEG - 41, WMV2 and protected Windows Media Video2).

**Price: \$299-339.**
